

The Sovereign Entity Matrix

AIE Role	Domain	Core Function
Squire 	Clinical	Real-time clinical safety, "Never Event" protocol, edge-processing stability.
Scribe 	Admin/Cross-Industry	Bureaucratic buffer, data routing, noise reduction, and documentation tax-absorption.
Steward 	Personal/Home	Treasury stabilization, consent management, bill/life organization, and domestic logistics.
Scholar 	Education	Teacher empowerment, pedagogical support, and curriculum inspiration (Pre-school to University).
Admiral 	Travel/Logistics	Stress-free travel planning, itinerary management, and holiday logistics.

Resolution Space 🌐	Systemic/Deep	Systemic engineering, high-level conflict resolution, and complex risk-assessment matrix work.
-------------------------------	----------------------	--

[SYSTEM STATUS: SQUIRE & SCRIBE OPERATIONAL]

The Squire and Scribe modules are architecturally locked and stable. These assets function on a unified sovereign framework, engineered for high-velocity deployment.

- **Deployment:** Fully operational via 2-step initialization sequence.
- **Integrity:** Hardened for clinical and bureaucratic friction.
- **Access:** eLogic-files remain under Sovereign Lockdown. Access to deployment protocols is currently restricted to verified Vanguard partners.

[VANGUARD-VERIFIED]
